PROJECTS

PUBLIC PHONEBOOK

- It's an application to store phone numbers of different institutions, organizations and companies, they can be sorted based on their category.

TIC TAC TOE GAME

- It's a beautiful and unique looking Tic Tac Toe game.
- It's a web-based application which is developed with HTML, CSS and JavaScript.

DEPARTMENTAL STORE SOFTWARE

- It's a GUI based software made with JAVA's library called JAVA-FX that I've made along with my friend.
- This is a software which can be used for a departmental store's transactions and daily life activities or tasks.
- It keeps details of inventory and all transactional information

STUDENT PORTAL

- It's a GUI based software made with JAVA's library called JAVA-FX that I've made along with my friend.
- This can be used inside any school (of small scale). It performs all basic level of functionalities required for a school. For instance, marking attendance of students, add/remove students' data, upload marks of students' assessments, etc.

HERO KNIGHT (2D GAME)

- It's a 2D platformer game, made with Unity game engine with C# scripting.
- There are two levels in the game.
- In this game, our main character sets out to defeat monsters and overcome traps that come along the way. In the end, we have to defeat the boss of all monsters to win the game.
